# Quality Education

Series: Encyclopedia of the UN Sustainable Development Goals

- Explores ways to ensure inclusive and equitable education
- Promotes lifelong learning opportunities for all
- Fosters knowledge to support the UN Sustainable Development Goal to ensure sustainable consumption and production

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume addresses SDG 4, namely "Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all" and contains the description of a range of terms, to allow a better understanding and foster knowledge.
